

Falcon 2 Tow Bar

One of the largest hookup radius in the industry for fast, easy connections.

Wide-radius swivel arms allow simple, one-person hookup, with independent adjustment of each arm, which lock into position as you drive away. Swivel joint and special bushings allow safe towing at up to 3" above level or 4" below level, giving you more options on vehicles you can tow. Exclusive internal safety collar serves as a back-up to the primary lock. Built-in guards prevent pinching when storing tow bar. Storage latch lets you fold bar up and to either side on the back of your motorhome. Powder coat finish resists corrosion.

Includes all Safety pins and cables

Requires mounting bracket, sold separately

Sells for \$689.99 (Camping World President's Club)

Asking \$200 obo
